

The New Curtain Program

Rollese Acmeda has designed a curtain system that removes the common pain points; faster installs, fewer parts, and easier adjustment.

AUTOMATE.

Simplified System

Two streamlined systems with shared components; fewer SKUs, faster fabrication.

AUTOMATE.

Faster Installation

Install with speed and precision; reduced rework and simplified on-site fine tuning.

Consistent Results

Uniform profile heights across
S24 and M33 tracks - offering
consistent production processes,
reducing measurement errors
and inventory management.

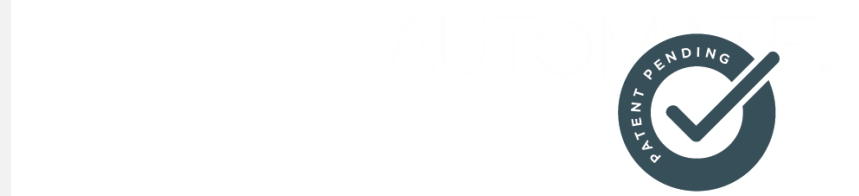

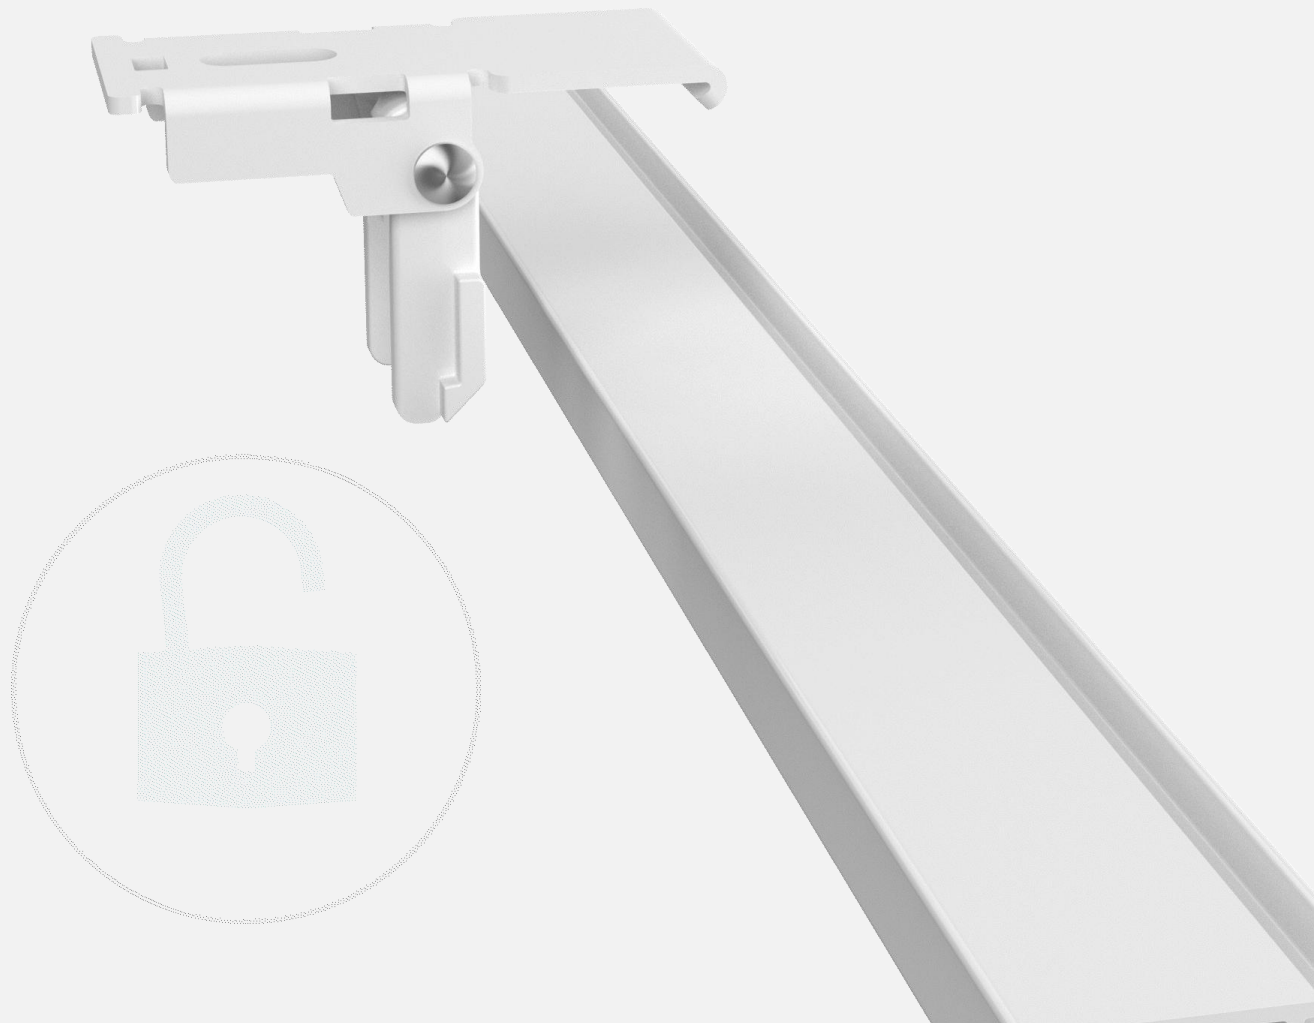

AUTOMATE.

Premium Aesthetics

Sleek track profile with
concealed, hardware,
delivering uncompromised
quality and a refined finish.

Track Joiners

S24 Joiner

The internally concealed, invisible join improves aesthetics, while precise track alignment ensures smooth runner operation over the join.

Available in black & white

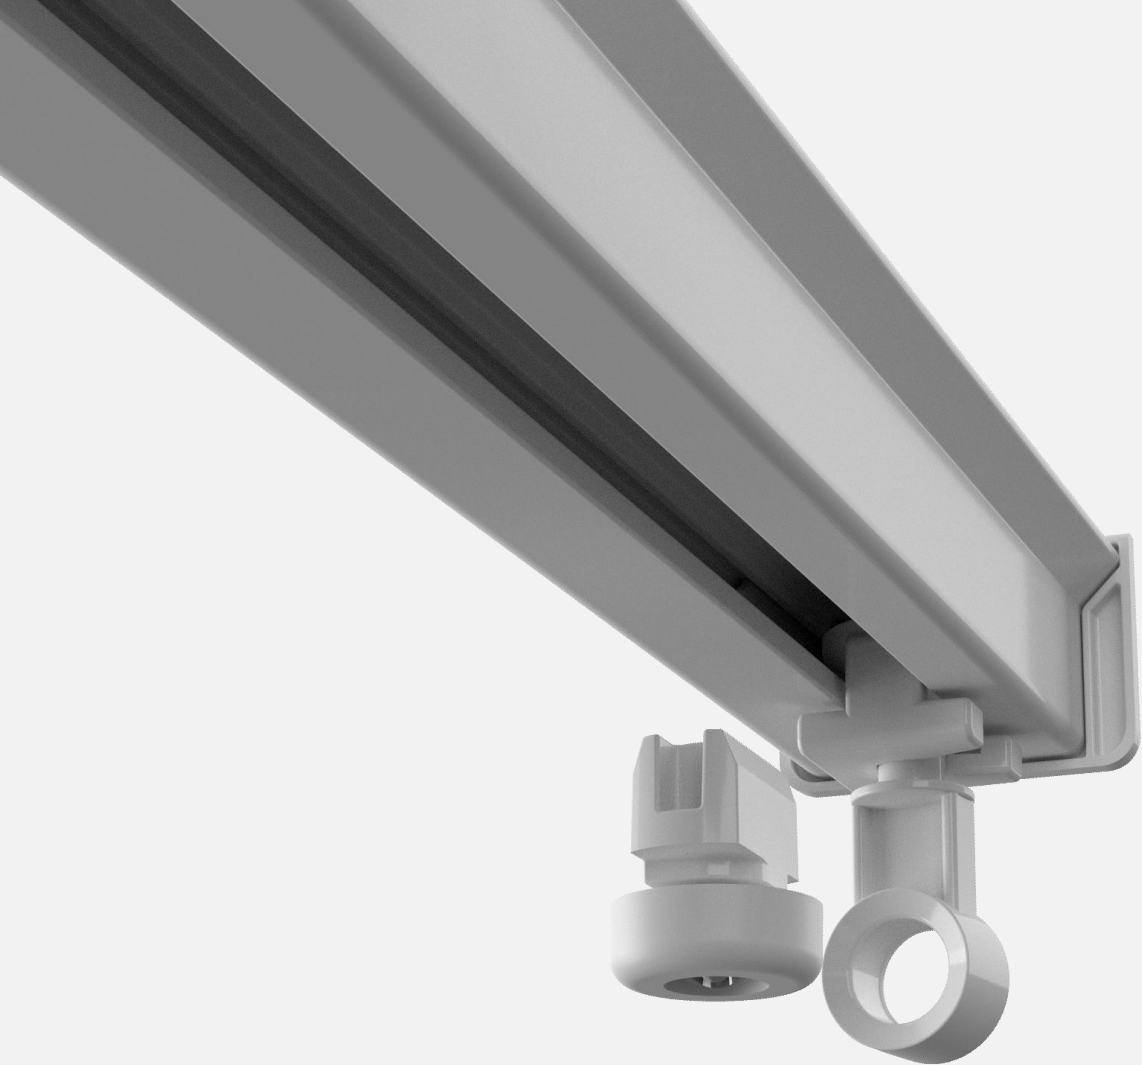

M33 Joiner

External joiner ensures smooth, uninterrupted operation while enabling Track-Lock bracket placement directly over the join.

Available in grey

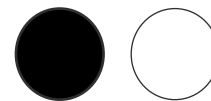

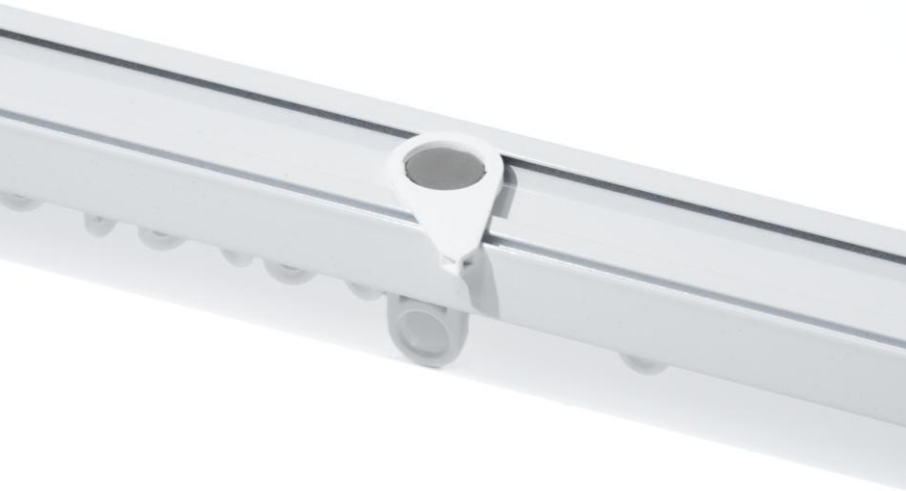

AUTOMATE.

Pendant **Anchor**

The patent-pending Pendant Anchor secures the end pendant in place, without end cap removal. Offering easy on-site adjustment without damaging the track.

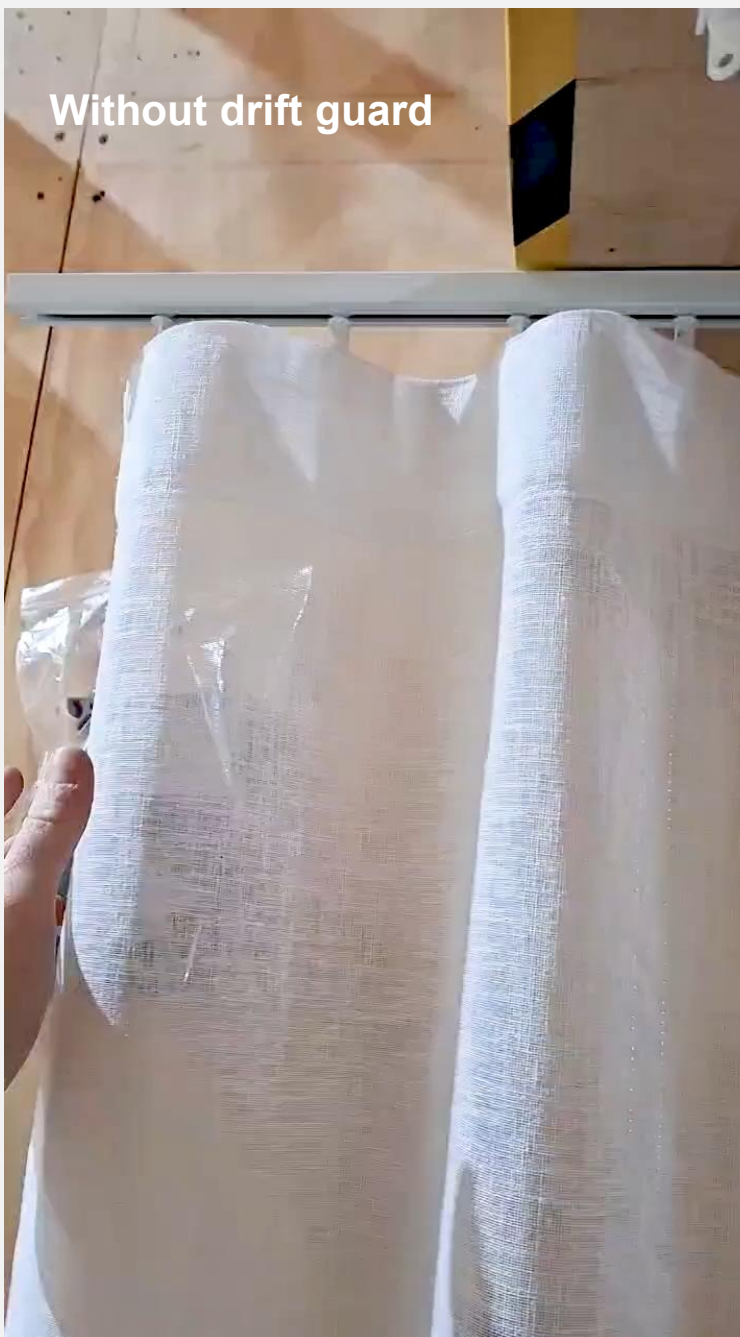

Available in black & white

Drift Guard

Drift Guard prevents fabric creep, delivering an aesthetic, consistent stack back with on-site adjustability. Compatible with both manual & motorised systems.

Track End Caps

Compatible with both S24 and M33 tracks, reducing SKU's required to carry both systems. Featuring secure bottom fixing for additional security and colour-matched recessed screws.

Return Drive

Motor Drive

M33 Motor & Return Drives

M33 Motor Drive combines double bearing smoothness, rigid steel alignment, and precise S-fold formation. Also offering fast pendant changes without removing the belt.

Reduce friction and improve performance with the M33 Return Drive, with a direct belt path, the compact design minimizes light gaps by maximizing carrier travel.

Pendant & Carrier Arms

Complete Pendant and Carrier Arm range supporting S-Fold, S-Wave and Pinch Pleat configurations, available in 54mm and 60mm pitch options.

AUTOMATE®

Versa Motors

- Soft-stop function for a quiet, elegant fabric finish
- Manual activation with a gentle pull
- Adjustable speed control
- Inverted mounting option
- Battery level check
- Interchangeable power options:

AC for continuous, maintenance-free power.

Li-ion Rechargeable Battery for a wire-free installation where power is difficult to access.

AUTOMATE.

AUTOMATE®

Controllers

- Available in 1, 5, 15 & 30 channels
- Group shades together or activate individually
- Slim, design to suit modern interior
- Tactile buttons with durable build
- Premium finish; Gloss White or Matte Black
- Push PRO features custom timers, shade naming functionality, 2.4" LCD screen with backlit display and a rechargeable battery.

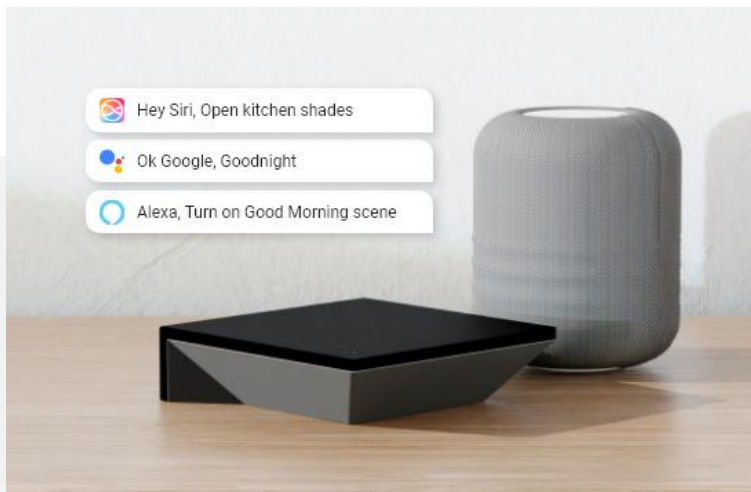

AUTOMATE®

Smart Control

App Control

The Automate Shades App offers seamless shade control from any smartphone or tablet. Personalise your shade routines by organising them into rooms, creating custom scenes, and setting timers.

Voice Control

Control your shades effortlessly using voice commands through Siri, Google Assistant, or Alexa on any device.

Smart Home Integrations

Easily integrate your Automate shades with other smart devices, including lights, security systems, thermostats, and much more.
